

Smart switching. The easy way to save.

36 days of free electricity per year!*

- Eliminates 100% standby energy of all connected appliances
- Easy access – ecoswitch® can be placed within easy reach: no bending, straining or forgetting
- Easy to use and install – even for the elderly and disabled
- Pay-back period for the average household is less than 26 weeks*
- Save over \$120 per year off your electricity bills*
- Save over 800kg of carbon dioxide per year*
- Reduces fire risk
- Longer life for appliances
- Control your appliances from a new easy location of your choice
- No electronics inside to fail or emit nasty electronic noise
- Safer than an ordinary extension cord
- Double sided tape and clips keep cords tidy
- Works with all 240V appliances (full 10 amps capacity)
- 12 month warranty

Unlike other energy saving devices, the ecoswitch®:

- Doesn't require programming, a remote control, or batteries
- Can be used with your existing powerboard/s
- Has a special flat plug that lets furniture sit closer to the wall

*estimated using 3 units per household
