RE: Mareg Plumbing & Bathroom Products Pty. Ltd., Water Wizz products & The Enter Shop.

To Whom It May Concern:

Mareg Plumbing & Bathroom Products Pty. Ltd. is proud to be a partner with The Enter Energy Shop. Enter Energy have shown themselves to be a committed and driven advocate for water conservation, we are confident with advice that the general public is given by their employees. The Enter Energy Store has, in the period that we have been partners with them, distributed large quantities of water savers to the public. It is refreshing to deal with an organisation with the level of commitment to genuine environmental conservation.

It is gratifying to be a part of a significant retrofitting project in the West which will, hopefully become an example for others to follow.

Mareg Plumbing & Bathroom Products Pty. Ltd. is the largest manufacturer of water saving devices in Australia, our products and indeed all of our suppliers are proudly Australian. Our products conform to the Water Services Association of Australia Conservation Rating and labelling Scheme: Tested to AS/NZ 6400-2003 clause 6.8 Certificate no.: 7056.

We supply Government bodies, all the water utilities and are accustomed providing large volume orders to or clients well into the hundreds of thousands of units, we will easily be able to meet any volumes required by this project.

Kind regards

Peter McKenna
Director
